

MISC-47

19 October 1964

SUMMARY  
TRIP REPORT  
Sept. - Oct. 1964

As a quick reference to the various installations visited on this trip the attached table has been prepared to summarize, in comparative fashion, my findings and conclusions.

25X1C

Summarized it would appear that no installation is perfect but that the [REDACTED] generally speaking, are superior to their U. S. counterparts. The 67th currently is in next best position although FICPACFAC has greater potential if drastic action is taken.
